GAMEFLOW

- The character must collect a Chrono-Ore in each level. Chrono-Ores, depending on their energy, are used to progress through the game and narrative.

- The player's objective is to bring the Chrono-Ore back to the exit. The Chrono-Ore acts as a hidden timer. It loses energy over time. This means the level must be completed as quickly as possible.

- To move faster, the player must use their full range of movements to perform combos.
